SUMMARY

Senior Product Manager at Microsoft building AI/ML-powered enterprise search and Microsoft 365 Copilot experiences. Focused on retrieval-augmented generation (RAG), grounding, search relevance and ranking, and large language model (LLM) evaluation. Led a cross-functional pod of 11 engineers, data scientists, and applied scientists.

PROFESSIONAL EXPERIENCE

Microsoft
Senior Product Manager
March 2026 - Present | Bellevue, WA (Remote)

- Lead retrieval quality for Files and Connectors in Microsoft 365 Copilot, grounding personalized enterprise search and answers in organizational data.
- Own quality across embedding-based indexing, lexical and semantic matching, ranking, and summarization for the LLM-powered search stack.

Microsoft
Product Manager II
August 2023 - March 2026 | Bellevue, WA (Remote)

- Led retrieval quality for Microsoft 365 Copilot Connectors, enabling grounding in enterprise data from ServiceNow, Salesforce, Confluence, Jira, and 100+ partner connectors.
- Led quality and evaluation for personalized search across Word, PowerPoint, and Excel files, plus Microsoft 365 Copilot extensibility.
- Established offline and online evaluation metrics, including clicks, LLM-as-a-judge labels, and paired comparisons, to guide retrieval improvements and detect regressions.
- Led a cross-functional pod of 11 engineers, data scientists, and applied scientists to ship ranking model improvements.

Microsoft
Product Manager
September 2021 - August 2023 | Bellevue, WA (Remote)

- Shipped Power BI and Viva Engage as native content sources in Microsoft 365 Copilot and Microsoft Search, extending grounding to dashboards and community knowledge.
- Led Natural Language Understanding (NLU) for Outlook, translating free-form user input into structured and keyword queries for indexing and search.
- Owned NLU metrics, identified gaps in user understanding, and drove fixes with partner engineering teams.

Microsoft
Product Manager Intern
May 2021 - September 2021 | Bellevue, WA (Remote)

- Delivered competitive and SWOT analysis of natural-language enterprise search to leadership; recommendations informed next-quarter implementation priorities and the multilingual support roadmap.

Amazon
Product Manager Intern
June 2020 - August 2020 | Nashville, TN (Remote)

- Designed weather and route-closure safety notifications for Middle Mile drivers; developed a driver safety mitigation matrix and standard operating procedures adopted by the team.
- Analyzed multi-year safety and weather data and authored a proposal projecting a 20% annual reduction in weather- and external-factor accidents.

EDUCATION

University of North Carolina at Charlotte
Master of Science, Data Science and Business Analytics
December 2024 - December 2026 (Expected)

University of North Carolina at Charlotte
B.S. Business Administration; B.S. Operations / Supply Chain Management
Minor in Economics | 2017 - 2021

PROJECTS

arXiv Search - Graduate course project, UNC Charlotte
October 2026 - Present | https://github.com/sidagarwal-labs/arxiv-search

- Built hybrid keyword and embedding search over 23,304 arXiv papers with a 400-query evaluation set and a human-calibrated LLM relevance judge; raised development-set nDCG@10 from 0.519 (tuned BM25) to 0.718.

SKILLS

AI and search: Artificial intelligence (AI), machine learning (ML), RAG, grounding, search relevance, ranking, embeddings, lexical and semantic search, LLM evaluation.

Product and analytics: Product management, A/B testing, evaluation metrics, cross-functional leadership, data science, business analytics.

Tools: SQL, Python, Tableau.

CERTIFICATIONS AND COURSEWORK

Tableau Desktop Certified; Technology Entrepreneurship: Lab to Market (University of Maryland); Developing SQL Data Models (SkillSoft); Querying Microsoft SQL Server (SkillSoft).

ADDITIONAL LEADERSHIP

Co-founded Hult Prize at UNCC and Consult-Your-Community at UNCC. Former team captain and mentor with Pitt Pirate Robotics (FIRST Robotics Competition).
